

Work and study  
in Germany.

# European Project Semester

#teamwork

## #study&work

Benefit from specially designed EPS modules during the preparatory phase.

Prepare your future engineering career and work in a company on 4 days. University studies on one day per week will round off your project work.

We offer innovative projects, academic and social support and exciting activities.

## #connect

Meet people from around the world and participate in exciting activities.

Be part of our unique EPS community and gain insight into different cultures.

Network with regional companies operating on a global level.

## Get ready and apply!

Check out the dates and deadlines:

We are looking forward to welcoming you.

## #international

Seize the opportunity! Study, work and connect with international students in Germany!

Our program will allow you to gain practical experiences in the engineering field.

The EPS team offers limited numbers of scholarships.

Interested?  
Visit our website for more information.

"I decided to participate [...] because I wanted to try something new, to discover new technologies, to learn new things and to meet new people."

Andrei  
Technical University of Iasi, Romania
